Summary

I am a software engineer with over ten years of experience. I enjoy full stack development and am perpetually motivated to understand systems. I am learning Rust in my spare time.

Experience

World of Warcraft Team Blizzard Entertainment
Senior Software Engineer May 2024 - Present

- Collaborated across engineering teams to ensure correct and maintainable solutions.
- Wrote technical documentation covering system design and relational data models.
- Using C++ and Lua, implemented both server code and client code for the in-game shop.
- Fixed bugs and wrote features for party matchmaking within a custom game mode using C++.
- Constructed Oracle database tables and wrote C++ code to load character customization data.

Data Platform Team Blizzard Entertainment
Senior Software Engineer Feb 2020 - May 2024

- Investigated and solved a Java gRPC memory leak caused by the Netty pooled allocator type.
- Implemented data pipeline components using Apache Beam, Apache Flink, and Elasticsearch.
- Utilized Docker, Kubernetes, and Helm to deploy containerized applications.

Teams Telemetry Team Microsoft
Software Engineer II Jan 2019 - Jan 2020

- Coded logic for metrics processing jobs using Apache Spark running on Azure Databricks.
- Worked on batch processing systems written with Apache Hadoop and Apache Oozie.

Advertising Analytics Team Amazon
Software Development Engineer I Nov 2016 - Dec 2018

- Contributed Java code to a system for Elasticsearch data ingestion and extraction.
- Crafted Redshift queries for automated ETL operations and ad-hoc data investigations.
- Designed a system to automatically analyze generated Excel reports for data defects.

Computer Science Development Group MathWorks
Associate Software Engineer Sep 2015 - Oct 2016

- Designed and implemented the MATLAB 3D image resize function `imresize3`.
- Added MATLAB code to Gaussian process regression functions in the Statistics Toolbox.

Education

College of Engineering and Computer Science University of Central Florida
B.S. in Computer Science, Minor in Mathematics Aug 2011 - May 2015

- Graduated summa cum laude with a 4.0/4.0 GPA.
- Member of the Burnett Honors College.

Side Projects

Web Games github.com/jaredbwasserman/web-games
Web Server with Multiplayer Games Oct 2021 - Jun 2023

- Created a web server for playing simple, multiplayer games including a lobby system.
- Utilized Node.js, Socket.IO, and Phaser to implement both the lobby and games.

Amundsen github.com/amundsen-io/amundsen
Elasticsearch 7 Support Jan 2022

- Wrote Python code that added support for Elasticsearch 7 to Amundsen (PR 1648).
- Enhanced support for Elasticsearch fields in Amundsen using Python (PR 1648).

Skills

Programming Languages: C++, Java, Lua, Node.js, Python, Rust, Scala

Data Technologies: BigQuery, Elasticsearch, Flink, MySQL, Oracle

Development Technologies: AWS, Azure, Docker, GCP, Git
